

Residential Energy Efficiency Compliance Declaration Form

JOB SITE ADDRESS: _____

2013 Residential Code of Ohio (RCO) 1101.2 Compliance

Compliance shall be demonstrated by meeting the requirements of one of the following options:

1. The "International Energy Conservation Code: (IECC); or
2. 2013 RCO Sections 1101 through 1104, Prescriptive Method; or
3. 2013 RCO Section 1105 - "The Ohio Home Builder's Association (OHBA) Alternative Energy Code Option" **The OHBA option is not available for additions and alterations.**

Applicant shall indicate the energy compliance option below:
Check One Option Below

1. 2009 International Energy Conservation Code (IECC)
Then check one of the following: Note: 2011 IECC 403.2.2: Duct leakage (tightness) testing and verification report required if air handler or ducts are not located within conditioned space.
 - REScheck based on the 2009 IECC
 - Prescriptive method based on 2009 IECC Table 402.1.1
 - Prescriptive method based on U-Factor alternative 2009 IECC Section 402.1.3
 - Prescriptive method based on Total UA alternative 2009 IECC Section 402.1.4
 - Simulated performance alternative 2009 IECC Section 405

Then Check one of the Following: For building envelope air tightness and insulation installation.

- Testing option per IECC Section 402.4.2.1 Air leakage testing (blower door) - verification report required
 - Visual inspection option per IECC 402.4.2.2 (third party inspection) - verification report required
2. **2013 RCO Sections 1101-1104, Prescriptive Method**
Note: RCO Section 1103.2.2: Duct leakage (tightness) testing and Verification report required if air handler or ducts are not located within conditioned space.

Then Check one of the Following: For building envelope air tightness and insulation installation.

- Testing option per RCO Section 1102.4.2.1 (blower door)
 - Visual inspection option per RCO Section 1102.4.2.2 (third party inspection)
3. **2013 RCO Section 1105 "The Ohio Home Builder's Association (OHBA) Alternative Energy Code Option" *The OHBA option is not available for additions and alterations**
* Effective January 1, 2014 **2013 RCO 1105.2.4.2.1:** Air leakage testing (blower door) and Verification report required.
2013 RCO 1105.3.2.2: Duct leakage (tightness) testing and verification report required.
Duct leakage (tightness) testing and verification report are required if air handler or all ducts are located within conditioned space.

Then Check one of the Following:

- Compliance Path #1*
- Compliance Path #2*
